

CLEVELAND POTASH

In the summer of 2008 we had extensive work carried out on our mineral hoisting system. We used Intellect for the main electrical installation work. I was more than satisfied with the quality of the work which was undertaken. The team was well organised, skilled and carried out there work to a high standard. In the four weeks duration of the project, there wasn't a single accident reported, and all tasks being carried out were undertaken in a safe manner, backed by appropriate risk assessments and method statements.

I would highly recommend Intellect, and would certainly have no hesitations in using them for future work
