For the attention of Mr Mark Hilditch; Siemens Industries

Dear Sir

Re: Intellect UK Ltd

At Corus (formerly British Steel) Teesside Beam Mill, we have been using Intellect UK Ltd for over 8 years as electrical contractors for both project work and as a manpower supplier to supplement our own craft manpower on maintenance days and major shutdowns. Recent projects they have been heavily involved in are the relocation and automation of the control systems for a 1350T hydraulic shear to a mill control room, and they are currently completing the installation of a control immobilisation system which will allow quick but safe access to a complex and potentially dangerous area of plant.

My experience of working with Intellect has always been a positive one. They are always quick to respond to any changes to our maintenance plan which in recent times can change with less than 24 hours notice, and they always strive to meet these challenges. The quality of the manpower they have supplied has at all times been excellent and Intellect are currently the only external company we regularly request labour from for our maintenance periods. For these reasons I would have no hesitation recommending Intellect UK Ltd for any project or labour only contract work.

Please contact me if you require any further information. My contact details are as above.

Yours faithfully

Andrew JD Wood BSc CEng MIEE

Electrical Maintenance Engineer
Teesside Beam Mill
