

Intelect Ltd specialise in the design, manufacture, installation and refurbishment of electrical control panels. The precision machining of components to customers requirements in both conventional and exotic materials including Inconel, Suplex, Stellite and Hastaloy. The fabrication and installation of a range of bespoke conveyor and elevator systems, platform and access structures, hoppers and associated ancillary equipment to client specification. The installation of process control systems including the associated electrical and pipe-work services to client specifications.

In practice, all phases of Intelects work are subject to quality control, from enquiry through to order processing, purchasing, engineering, production, installation and inspection and test. All work is in accordance with written procedures, with lines of responsibility and accountability defined checks incorporated. A detailed quality manual is available for the works including all necessary procedures and instructions. All personnel are well versed and trained for the work they are to do and safety is a prime consideration.

In order to achieve this we are committed to a continual improvement culture throughout the organisation based on stated company objectives and the EN ISO 9001:2008 standard. We are certified to ISO9001:2008 and all our procedures, checklists and instructions comply with this standard.

The principles embraced in the standard have been embodied in our formal Quality Management System. This system is an essential company framework that will allow us to gain competitive advantage, as well as reinforcing and enhancing the company's reputation and image.

The directors will commit to ensuring that reasonable sufficient funds and resources are made available to ensure that the Quality can be achieved, and will appoint and Quality Manager that will be responsible to the Board of Directors for the implementation and continual review of the Quality policy.

The policy of the Board of Directors of Intelect Ltd is aimed at implementing and maintaining quality and safety in an effective and economically practical way. The basic principle is; that it should be possible to meet the requirements agreed with the client and satisfy their expectations at any time.

We will ensure arrangements are made for effective communication and the promotion of competency throughout the company by educating and training our staff. We will use our newsletter and staff notice boards to publicise out targets and performance.

Signed
