

To Whom It May Concern

24 July 2009

Dear Sir

Re: Intelect UK Ltd

In August 2005, Intelect UK Ltd were on site as part of our Summer Shutdown project.

Their areas of responsibility were as follows:

- Testing distribution boards
- Testing & inspecting socket outlets
- Testing RCD Sockets
- Changing light fittings in car park

All site installation risk assessment forms & method statements were provided in a timely manner.

Intelect UK Ltd also carried out electrical shutdown work on this site in 2003 and installation work in 2007.

The teams from Intelect UK Ltd conduct themselves professionally at all times and I would not hesitate in recommending them to carryout electrical work.

Yours faithfully

John Martin
Facilities Manager
